

# ANATOMY OF THE LOWER EXTREMITY

BONES- 32

JOINTS, JOINT CAPSULE

LIGAMENTS

MUSCLES- 58

TENDONS

BURSA

NEURO/ VASCULAR

# Beautiful, Balmy Buffalo

# HIP

deep seated ball & socket joint, pain often referred from back

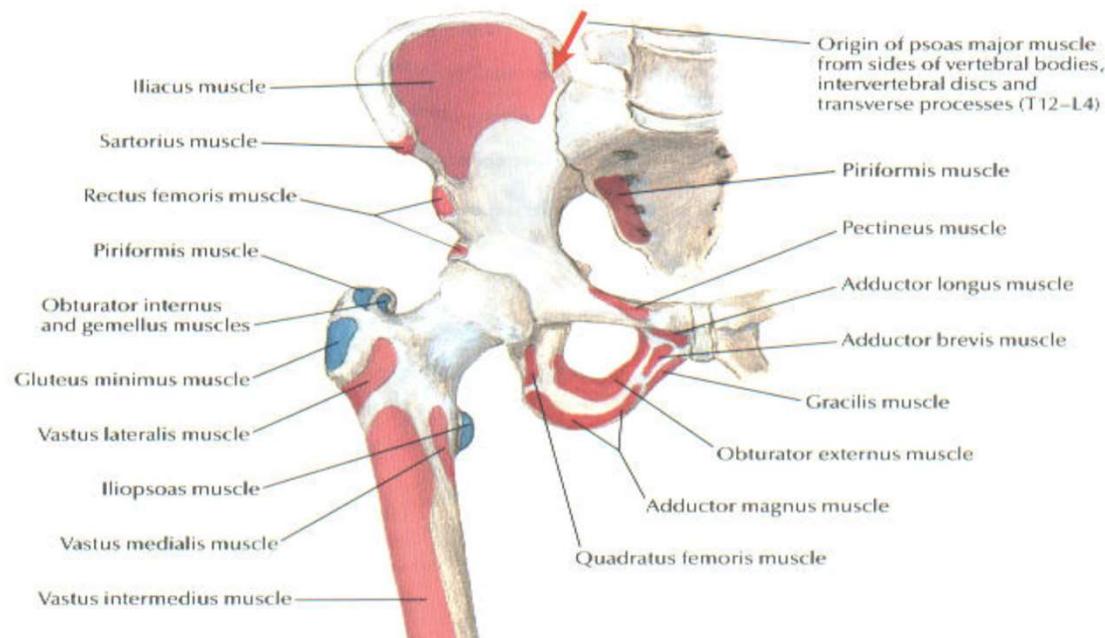

**BONES**- femur, coxal bone made up of ilium, ischium & pubic bone

**JOINTS**- acetabularfemoral (hip joint), sacroiliac, pubic

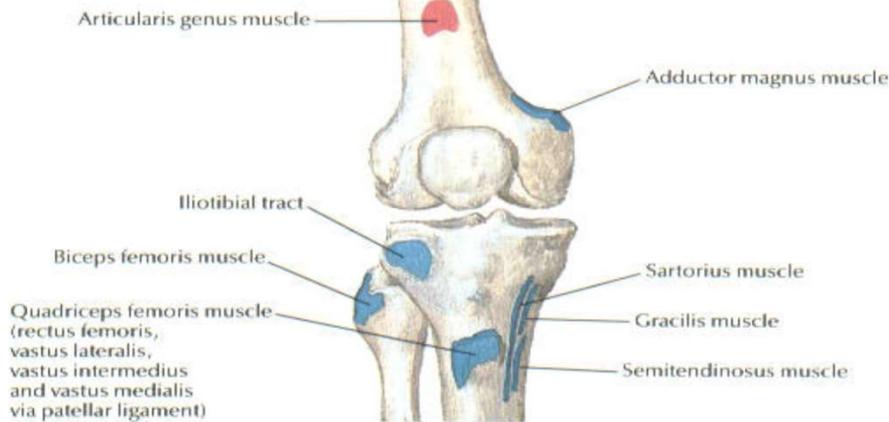

**BONY INJECTION LANDMARKS**- greater trochanteric process

**FRACTURE DESCRIPTIONS**- femoral head, neck,  
intertrochanteric, subtrochanteric, shaft

## Bony Attachments of Muscles of Hip and Thigh: Anterior View

■ Origins  
■ Insertions

*J. N. Heller*  
Illustrator

# HIP- anterior view

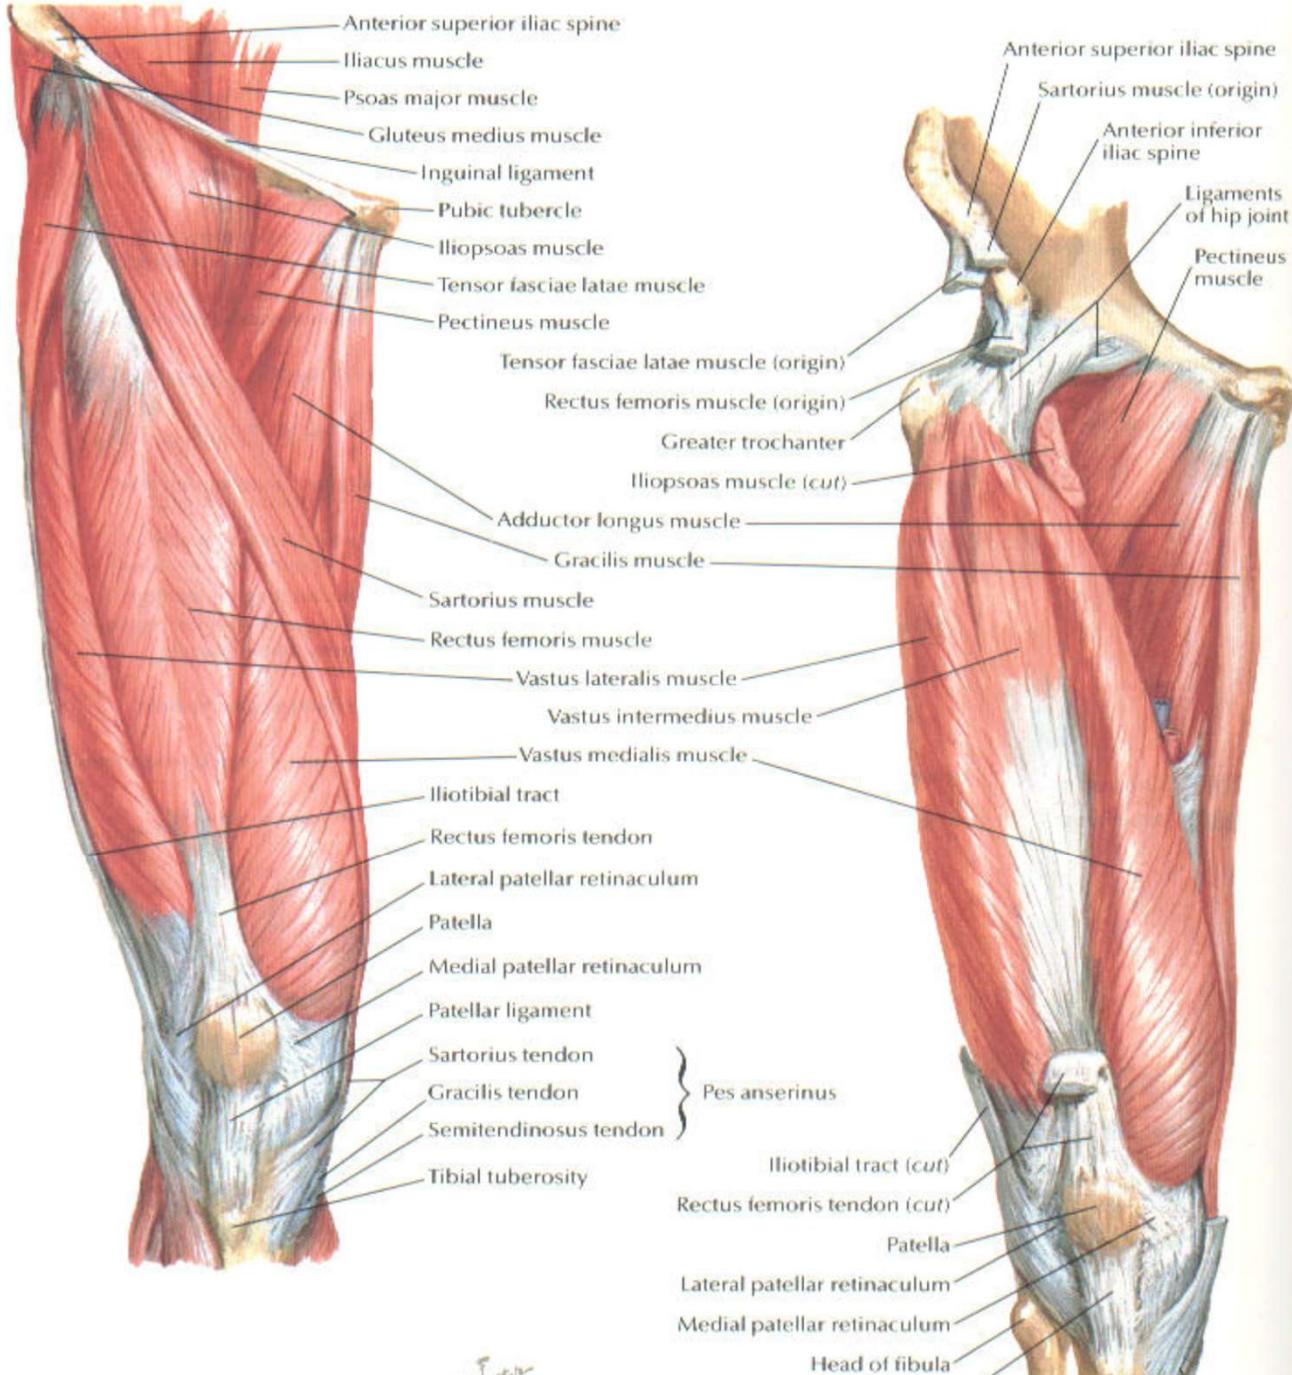

## MUSCLES-

adductors- gracilis, pectineus, adductor longus, brevis, magnus

flexors- iliopsoas, sartorius, rectus femoris

knee extension- vastus lateralis, medialis, intermedialis & rectus femoris (make up quadriceps)

## *Muscles of Thigh: Anterior Views*

# HIP- posterior view

## MUSCLES-

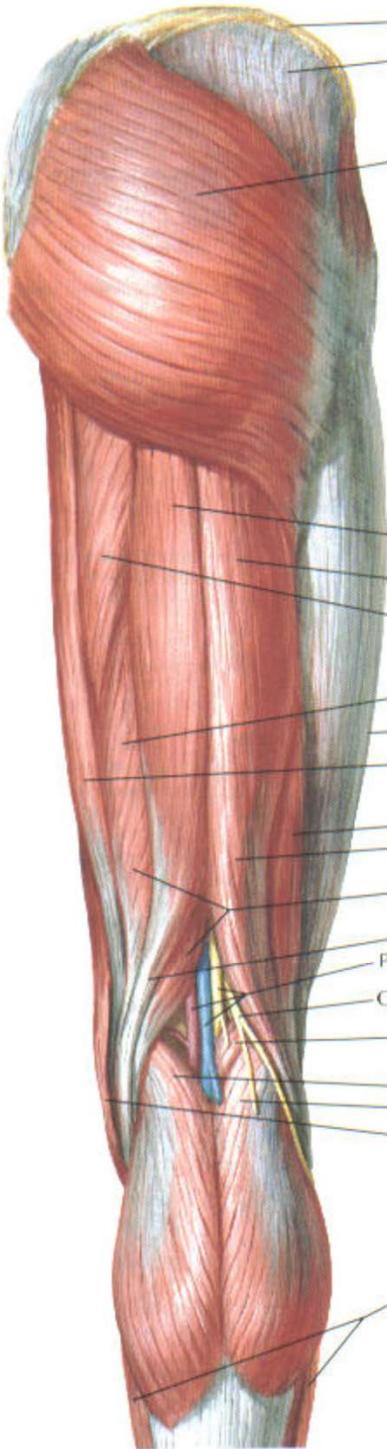

extensors- gluteus maximus,

biceps femoris, semimembranosus, semitendinosus,  
(hamstrings)

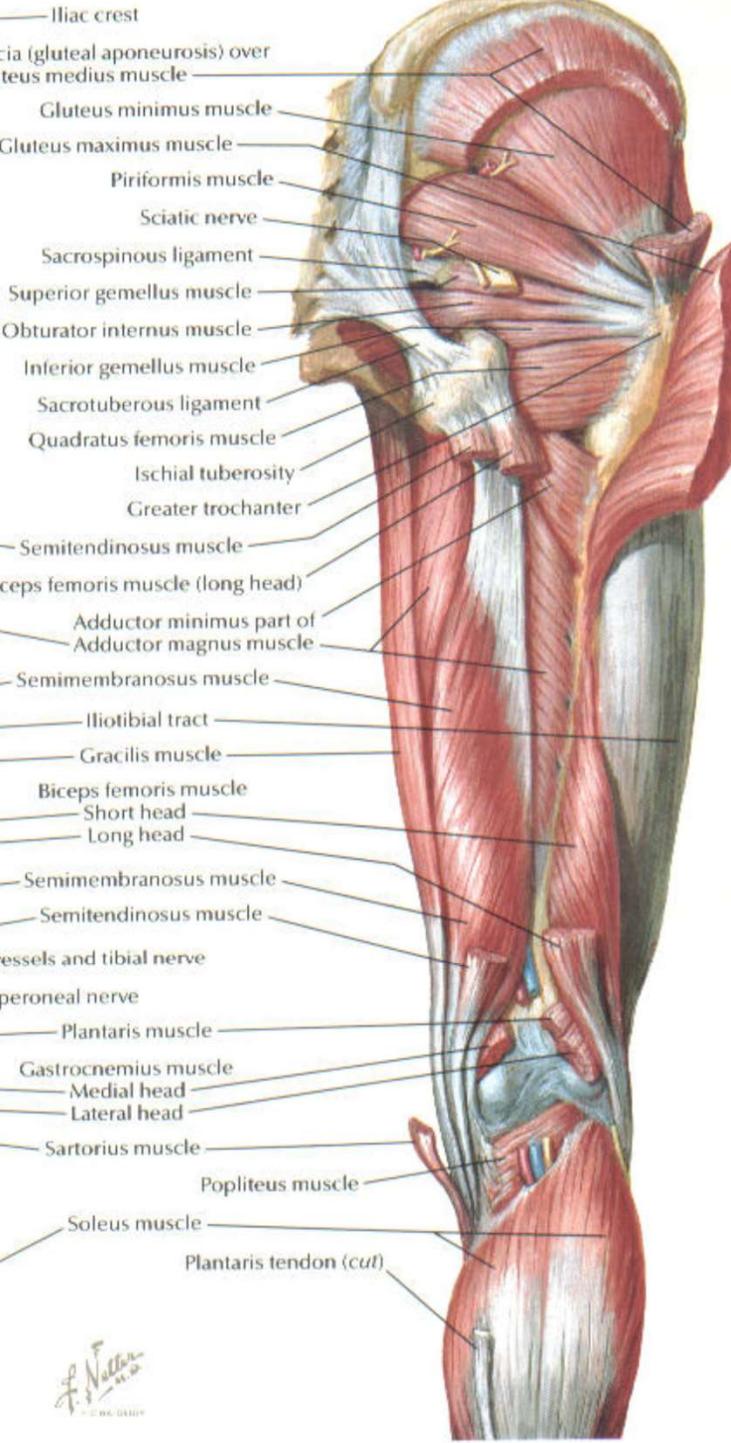

abductors- gluteus medius

knee flexor- hamstrings

### Superficial dissection

### Deeper dissection

# ANATOMY OF THE KNEE

The largest, most accessible & most commonly injected joint

BONES - femur, tibia, fibula, patella

JOINT- knee joint (3 compartments)- medial, lateral, patellofemoral

BONY INJECTION LANDMARKS - superior pole of the patella (A), inferior pole of patella (B), medial (D) & lateral (E) tibial plateau, anterior tibial tuberosity (C)

SOFT TISSUE LANDMARK- patellar tendon (F)

INJECTION PORTALS- superior lateral approach with knee straight (I)  
anterior medial approach with knee at 90  
degrees flexion (J)  
anterior lateral approach with knee at 90  
degrees flexion (K)

SOFT TISSUE ANATOMY- suprapatellar bursa/poach (G)  
synovial cavity (H)

# ANATOMY OF THE KNEE

# KNEE

**MUSCLES-** extensors- quadriceps- vastus lateralis, medialis, intermedialis, rectus femoris

flexors- hamstrings- biceps femoris, semimembranosus, semitendinosus

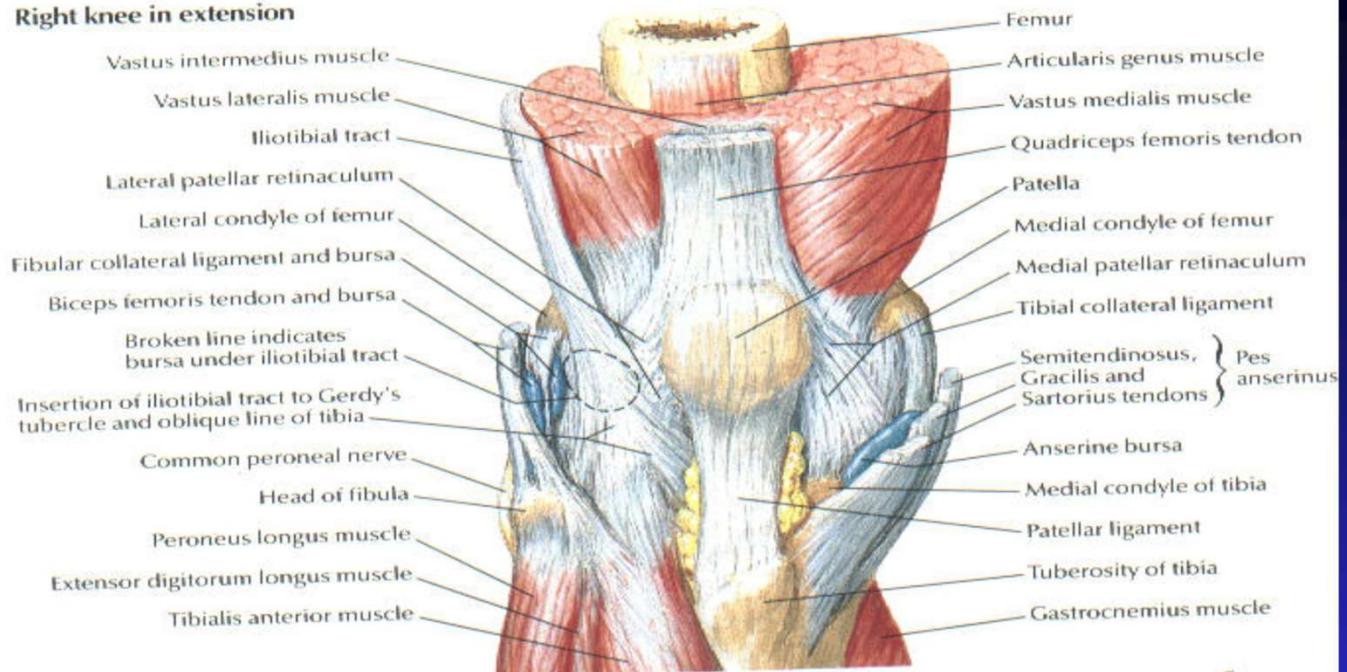

**LIGAMENTS-** medial & lateral collateral  
anterior & posterior cruciate

**MENISCUS-** medial & lateral

**BURSA-** prepatellar, pes anserine

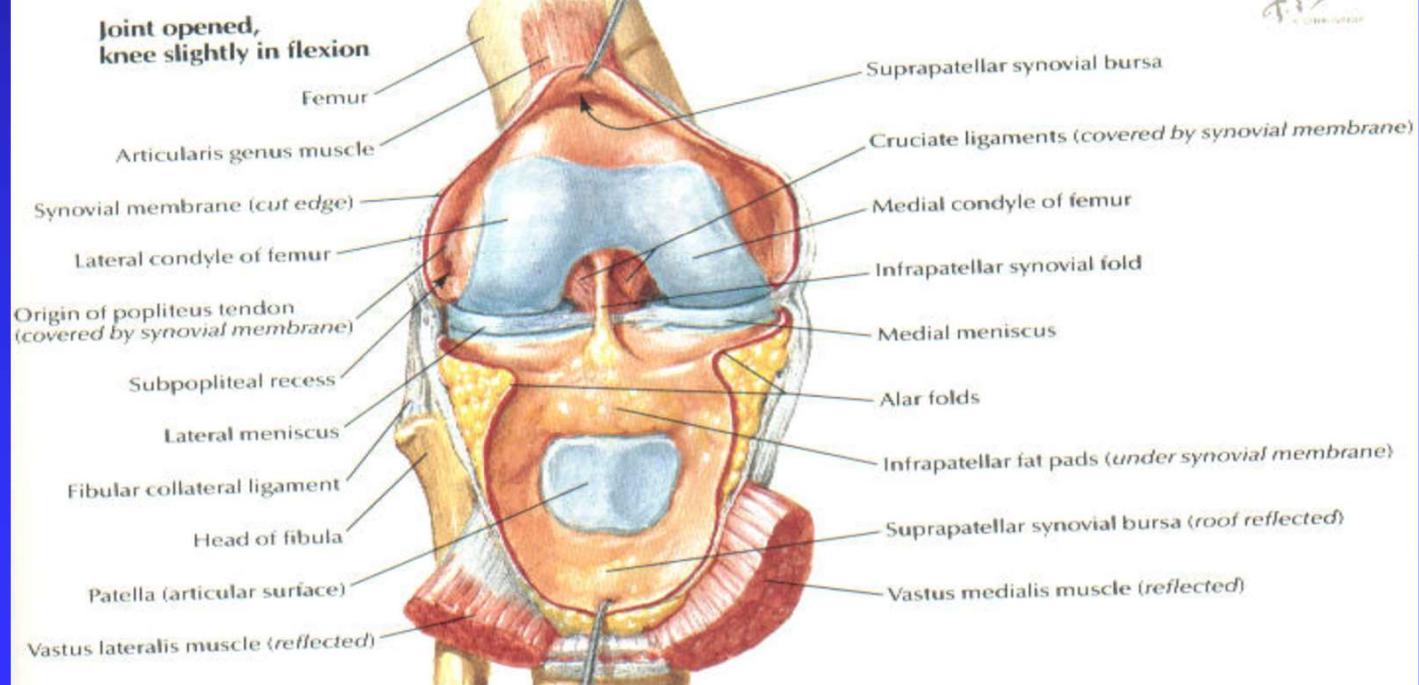

**INJECTION LANDMARKS-** anterior tibial tubercle, medial joint line are used for pes anserine injection, superior & inferior patellar pole, medial & lateral joint line are used for knee joint injection

### Right knee in extension

*J. N. Moore  
© Churchill Livingstone*

### Joint opened, knee slightly in flexion

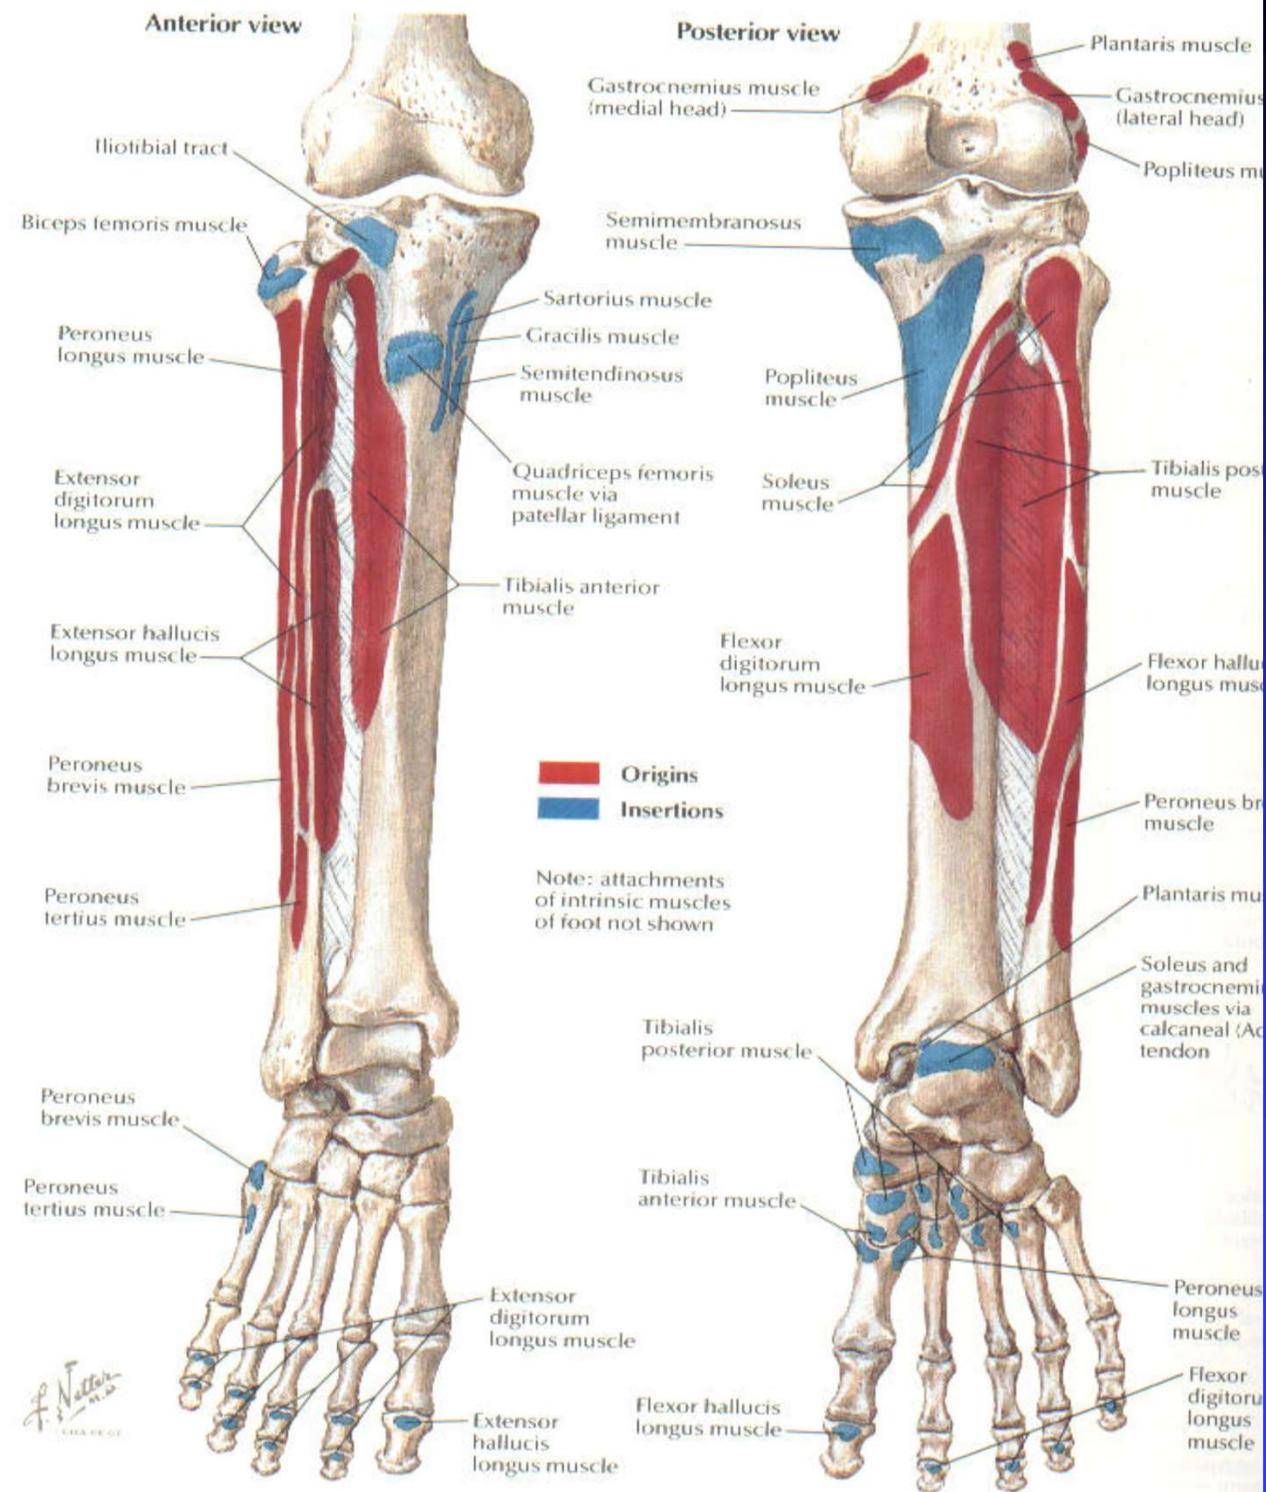

# ANKLE & FOOT

**BONES**- tibia, fibula, talus, calcaneus, navicular, cuboid, cunioforms (3), metatarsals (5; T for toes), phalanges (toes) 2 thru 5 have proximal, middle, distal phalanx, 1<sup>st</sup> phalange (big toe) has proximal and distal

**JOINTS**- ankle (talofibular, talotibial), metatarsal phalangeal (mtp), proximal interphalangeal (pip), distal interphalangeal (dip)

**BONY INJECTION LANDMARKS**- lateral & medial malleolus, medial calcaneal tubercle

**FRACTURE DESCRIPTIONS**- lateral & medial malleolar, bi & trimalleolar, metatarsal (march), 5<sup>th</sup> metatarsal, base (Jones), body, neck

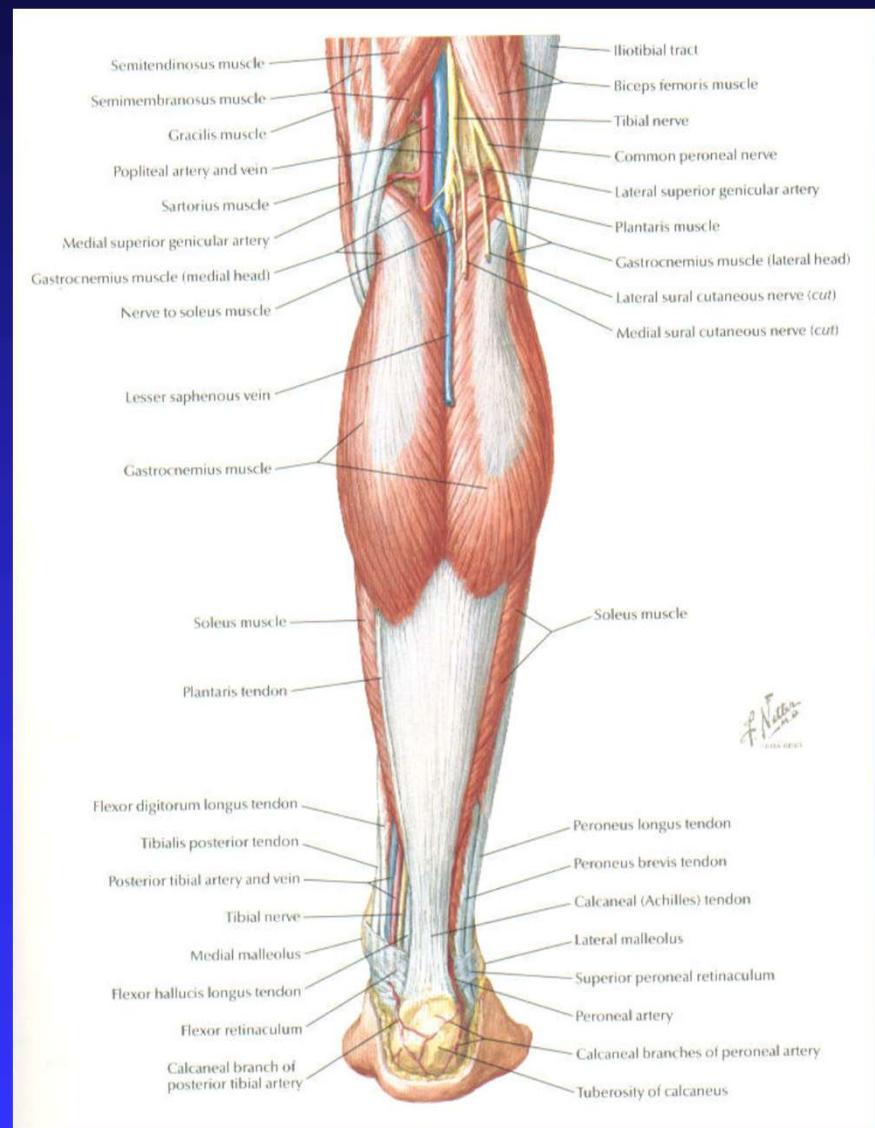

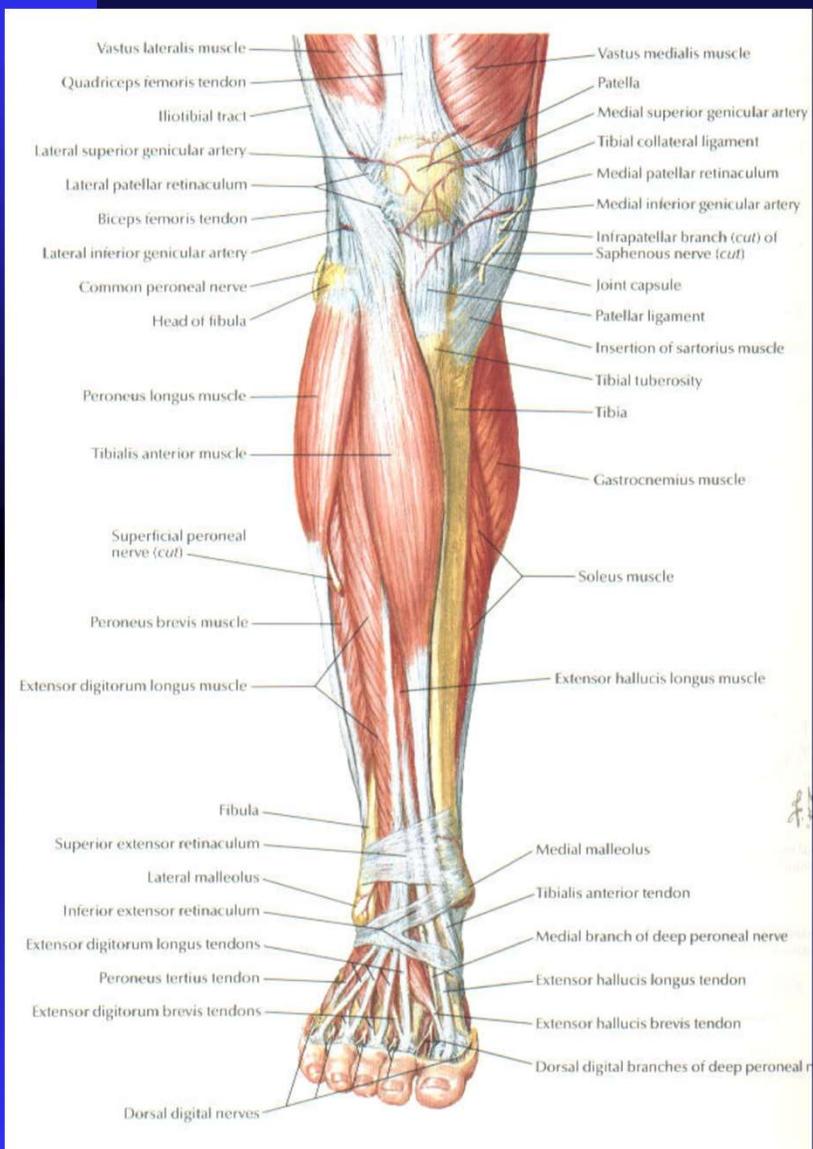

# ANKLE & FOOT

## MUSCLES-

dorsiflexion- tibialis anterior, extensor hallicus longus,  
extensor digitorum

plantarflexion- gastrocnemius, soleus

# ANKLE & FOOT

## MUSCLES-

everters- peroneus longus & brevis

inverters- Tibialis posterior, flexor Digitorum longus, flexor Hallicus longus (Tom, Dick, ANd Harry)

## FASCIA- plantar fascia

## BURSA- retrocalcaneal

## INJECTION LANDMARKS- plantar fascia
