

Exploring the Determinants of the Determinants: Health Policy Influences Health Outcomes

Alicia Bolden, DMSc, MPH, PA-C

Daytheon Sturges, PhD, MPAS, PA-C, DFAAPA, CHES®

Disclosures

Speakers have nothing to disclose.

Session objectives

At the conclusion of this session, participants should be able to:

- Compare U.S. health access and equity standings to other developed countries
- Review World Health Organization's definition of social determinants of health
- Describe the factors, systems, and structures that create, perpetuate, or exacerbate differences in health outcomes
- Describe The Political Determinant of Health Model
- Discuss the three major political determinants of health
- Explore strategies to promote advocacy for action steps in pursuit of health equity

Determinants of Health

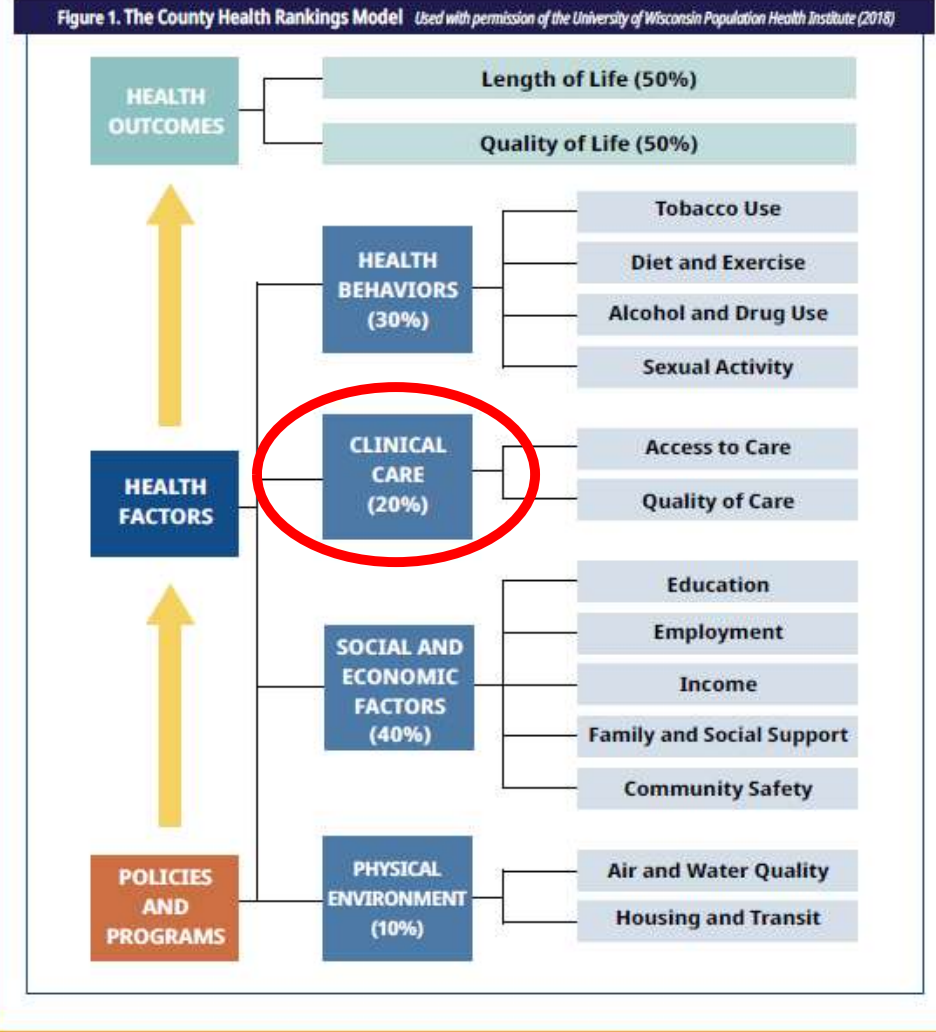

5 Domains of factors that influence health:

- Behavioral Patterns
- Genetics
- Social Circumstances
- Health Care
- Environmental Exposures

HEALTH IMPACT MODEL

- Used for County Health Rankings
- Emphasizes the many factors that influence how long and how well we live

Social Determinants of Health:
“the conditions in which people
are born, grow, work, live and
age, and the wider set of forces
and systems shaping the
conditions of daily life”.

Economic Stability: Food security, housing, employment, and income/poverty level

Neighborhood and Built Environment: Quality of housing, food access, violence, crime/public safety, environment (clean water and air or pollution), healthy workplaces, schools, and transportation

Education: Language and literacy, educational attainment, and early childhood development

Social and Community Context: Social support, social cohesion, civic engagement, faith-based communities, and incarceration

Health and Health Care: Access to primary, specialty, and emergency care, affordability, health literacy, quality of care, and insurance coverage

Biology: Genetics, race/ethnicity, gender identity, and sexual orientation

Health Behavior: Personal health practices and behaviors (eating, exercise, sexual practices, etc.)

Social Determinants of Health

- Shared by the World Health Organization (WHO) Commission on Social Determinants of Health
- Designed to identify ways to create social and physical environments that promote good health for all

The Political Determinants *of* Health

Daniel E. Dawes

Foreword by
DAVID R. WILLIAMS

“Political determinants are the instigators of the causes. They are the determinants of the determinants”
~Dr. Daniel Dawes

WHY?

- More attention has been spent on the social and economic forces impacting health equity.
- The factor we spend very little attention on is the political determinants.
- We undervalue the impact that political forces have on an individual's and the larger society's health and wellbeing.

Health Screening

We believe everyone should have the opportunity for health. Some things like not having enough food or reliable transportation or a safe place to live can make it hard to be healthy. Please answer the following questions to help us better understand you and your current situation. We may not be able to find resources for all of your needs, but we will try and help as much as we can.

	Yes	No
Food		
1. Within the past 12 months, did you worry that your food would run out before you got money to buy more?		
2. Within the past 12 months, did the food you bought just not last and you didn't have money to get more?		
Housing/ Utilities		
3. Within the past 12 months, have you ever stayed: outside, in a car, in a tent, in an overnight shelter, or temporarily in someone else's home (i.e. couch-surfing)?		
4. Are you worried about losing your housing?		
5. Within the past 12 months, have you been unable to get utilities (heat, electricity) when it was really needed?		
Transportation		
6. Within the past 12 months, has a lack of transportation kept you from medical appointments or from doing things needed for daily living?		
Interpersonal Safety		
7. Do you feel physically or emotionally unsafe where you currently live?		
8. Within the past 12 months, have you been hit, slapped, kicked or otherwise physically hurt by anyone?		
9. Within the past 12 months, have you been humiliated or emotionally abused by anyone?		
Optional: Immediate Need		
10. Are any of your needs urgent? For example, you don't have food for tonight, you don't have a place to sleep tonight, you are afraid you will get hurt if you go home today.		
11. Would you like help with any of the needs that you have identified?

The Vot-ER Healthy Democracy Campaign: A National Medical Student Competition to Increase Voting Access

Talia R. Ruxin, Yoonhee P. Ha, MSc, MPhil, Madeline M. Grade, MD, MSc, Rory Brown, Carlton Lawrence, MD, MPP, and Alister F. Martin, MD, MPP

Abstract

Problem

Voting affords citizens a direct say in the leaders and policies that affect their health. However, less than 20% of eligible U.S. citizens have been offered the chance to register to vote at a government-funded agency like a hospital or clinic that provides Medicaid or Medicare services. Medical students are well positioned to increase voting access due to their interactions with multiple actors in health care settings, including patients, visitors, colleagues, and others.

Approach

Vot-ER, a nonpartisan, nonprofit organization that aims to promote civic engagement in health care settings, launched the inaugural Healthy Democracy Campaign from July 20 to

October 9, 2020. As part of this national, gamification-based competition, medical student captains were recruited to lead teams of health care trainees and professionals that helped eligible adults start the voter registration and/or mail-in ballot request process before the November 2020 elections. Post competition, medical student captains were surveyed about their motivations for participating and skills and knowledge gained.

Outcomes

In total, 128 medical student captains at 80 medical schools in 31 states and the District of Columbia formed teams that helped 15,692 adults start the voter registration and/or mail-in ballot request process. Eighty-two (64.1%) captains

responded to the post competition survey, representing 56 (70.0%) of the participating schools. The top-ranked motivation for participating in the campaign was the desire to address social and racial inequities (37, 45.1%). Respondents reported gaining skills and knowledge in several aspects of civic engagement, including community organizing (67, 81.7%) and voting rights (63, 76.8%). The majority of respondents planned to incorporate voter registration into their future practice (76, 92.7%).

Next Steps

Future Healthy Democracy Campaigns will aim to continue closing the voting access gap and promote the long-term inclusion of hands-on civic engagement in medical education and practice.

Problem

Civic engagement, including voting, invites active participation by citizens in the democratic governance of their communities and allows individuals to have a direct say in the leaders and policies that affect the social determinants of health.¹⁻⁴ The National Voter Registration Act of 1993 sought to expand voting access by legalizing nonpartisan voter registration at state agencies offering public assistance, including any hospital or clinic that

However, less than 20% of eligible U.S. citizens have been offered the chance to register to vote at a government-funded agency,⁵ and health care settings remain underused spaces for increasing voting access.^{1,6,6}

Medical students are well positioned to increase voting access due to their interactions with multiple actors in health care settings, including patients, visitors, fellow trainees, health care professionals, and others. However, standard medical school curricula do not offer hands-on

competition was designed to mobilize medical students across the United States to increase voting access ahead of the November 2020 elections. Gamification promotes behavioral change in nongame settings by drawing on the elements of games to enhance individuals' experiences and motivations.^{3,7} Also, as part of the HDC, we sought to encourage safe voting during the COVID-19 pandemic by raising awareness of mail-in voting.⁸
