The Honorable Paul Ryan  
Speaker of the House  
H-232, The Capitol  
United States Congress  
Washington, DC 20515

The Honorable Nancy Pelosi  
Democratic Leader  
H-204, The Capitol  
United States Congress  
Washington, DC 20515

The Honorable Kevin McCarthy  
Majority Leader  
H-107, The Capitol  
United States Congress  
Washington, DC 20515

The Honorable Steny Hoyer  
Democratic Whip  
1705 Longworth House Office Building  
United States Congress  
Washington, DC 20515

Dear Leaders Ryan, Pelosi, McCarthy and Hoyer,

The undersigned organizations thank you for your leadership and the time and resources this Congress has dedicated to turning the tide on the current opioid overdose epidemic.

To prevent future crises related to substance misuse and addiction, legislative solutions that require a new approach to the delivery of substance use prevention, addiction treatment, and recovery support services will be necessary. With 174 Americans dying from drug overdose each day, and those lives still at risk, additional strategies are needed to combat this public health emergency.

As part of a comprehensive approach to addressing the opioid overdose epidemic, it is essential that access to evidence-based addiction treatment services be increased. As the House prepares to consider legislation to address the opioid overdose epidemic, we ask that the legislative package include the following policies:

- Establish opioid treatment programs (OTPs), as certified and accredited by the Substance Abuse and Mental Health Services Administration (SAMHSA), as covered Medicare providers;
- Provide appropriate reimbursement in Medicare to enable OTPs to provide the medications and necessary wraparound services related to the treatment of substance use disorder in OTPs;
- Require the Secretary of the Department of Health and Human Services (HHS) to work with stakeholders in the addiction medicine field to design a payment bundle and any subsequent additional services that may be added to the list of covered services through the rulemaking process;
- Direct the Secretary of HHS to work judiciously to promulgate any necessary regulations regarding the above;
- Make permanent the authorization that allows nurse practitioners and physician assistants to treat patients with buprenorphine;

- Allow practitioners who hold “additional credentialing” or who provide medication-assisted treatment in a “qualified practice setting” to treat up to 100<sup>1</sup> patients with buprenorphine in year one; and
- Codify the Final Rule issued by the Department of Health and Human Services in July 2016 that raised the DATA 2000 patient limit for certain physicians to 275 patients (while preserving the ability of the HHS Secretary to adjust the patient limit).

Thank you for your attention to this important matter. We urge Congress to support these necessary policies to combat the opioid overdose epidemic, and in turn, save lives.

Sincerely,
