

Hello and thank you for participating in this session, Basic 12-Lead ECG Workshop. This is a two-hour session but utilizes the same handout. My contact information can be found on the last slide and feel free to reach out and ask questions. Below, I have described the various handouts that are included for this series to help you practice and hopefully improve your skills.

1. AAPA Basic ECG Interpretation Workshop 2020 Handout: This is the master handout from which the recordings are based. I have removed several slides that had copyright material included. Thus, the slide numbers on the recording may not align with the slide numbers on the handout.
2. Basic 12-Lead ECG Workshop ECGs Embedded in PPT: In this file, I have pulled out selected 12-lead examples and unknowns from the above handout that provide a better full-size view. There are 6 unknown ECGs at the end for you to practice with. The key for these can be found in the next file below.
3. Basic ECG Workshop Handout Unknown ECG Answers: Key to the above 6 unknown 12-lead ECGs found in the file above.
4. BASIC take home practice ECG file MASTER 2020: Here is an additional ten 12-lead ECGs for you to practice on to reinforce your developing skills.
5. Take Home Practice ECG Key 2020 Basic ECG Workshop: This is the key for the ten unknown ECGs above.
6. Reading an EKG Handout: I hope you find this handout useful for a quick, to the point reference for most of the common ECG issues you are likely to run across in primary care. Not exhaustive by any means, but a great place to start.

Thank you again for working through this two-hour session and wishing you the best as you work to enhance your ECG interpretation skills.

Darwin Brown, MPH, PA-C
